3. A motion was made –

Proposed new rule :

All MRAN Desert Race Events shall have the finish line placed before the beginning of the pits. Racers are NEVER to race through the pits at the end of a race to get to the finish line. Racers are to race to the checkered flag/scoring. There will be no speed limitations before the finish line. If there are any issues it is recommended that the sponsoring club create a chicane or track sections so riders can be separated at the finish line and be scored clearly with no controversy.

Purpose of new rule :

I am proposing this rule addition to solve a few problems we have had at races. This used to be an unwritten rule that was always followed. We just need clubs to be aware so we have safe and fair racing. This is not a put down on anyone or any club. I just believe that this rule that should be followed for safety and fairness.

Affected Sections of the rule book :

Section 6 Course markings

4. A motion was made –

Proposed new rule:

Sponsoring Desert Race Clubs must allow adequate time for racers to complete their required laps. At a minimum racers must be given the time between the first start line and the last after the overall leader finishes. Example : The last Novice line leaves 15 minutes after the first Expert line. Then the club must allow 15 minutes after the overall leader finishes for racers to keep going to complete their required laps.

Purpose of new rule :

This rule is proposed to have consistency and fairness in the way races are finished.
